Profile Summary

DevOps Engineer with 7+ years of hands-on experience in Microsoft Azure, specializing in **Infrastructure as Code (Terraform)**, **CI/CD automation (Azure DevOps, GitHub Actions)**, and **DevSecOps practices**. Proven track record of **reducing deployment time by 80%**, **cutting cloud costs by 20%**, and maintaining **99.9% availability** across **multi-environment Azure infrastructures**. Experienced in **mentoring junior engineers** and driving adoption of **Git workflows**, **security-first pipelines**, and **IaC best practices** at scale.

Technical Skills

Infrastructure as Code (IaC) :

HashiCorp Terraform

CI/CD Tools :

Azure DevOps, GitHub Actions, YAML pipelines

Version Control :

Git, GitHub, Git Flow, Trunk-Based Development

Cloud Platforms :

Microsoft Azure, Basic exposure to AWS

Security & Compliance :

Azure Key Vault, RBAC, Managed Identities, SonarQube (SAST), GitHub Secrets, SCA

Containers & Orchestration :

Docker, Kubernetes (AKS)

Scripting & OS :

PowerShell, Linux

Monitoring & Observability :

Azure Monitor, Log Analytics Workspace

Certificates

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: DevOps Engineer Expert (AZ-400)

Education

Diploma in Electronics & communication – 2007 (Board of Technical education – UP)

Btech in Electronics & telecommunications – 2014 (Karnataka state Open university)

Work Experience

Quess corp Limited

Sep 2024– Till Now| Lucknow, India

- Automated infrastructure provisioning using **Terraform (IaC)** for multiple environments.
- Built and optimized **CI/CD pipelines** improving deployment speed and reliability.
- Worked with **Docker containers** and supported Kubernetes-based deployments.
- Monitored applications and infrastructure to ensure **high availability (99.9%)**.
- Collaborated with cross-functional teams for smooth release cycles.

Kutumbh Care Pvt Ltd.

Jan 2019 – Sep 2024 | Patna, India (Onsite)

- **Provisioned multi-environment Azure cloud infrastructure** (Dev, QA, UAT, Prod) using **Terraform reusable modules**, reducing environment setup time by **40%**.
- Implemented **remote Terraform state management** using **Azure Blob Storage** with **state locking**, reducing state conflicts by **35%** and eliminating **infrastructure drift**.
- Managed source code using **Git Flow** for application repositories and **Trunk-Based Development** for infrastructure, reducing **merge conflicts** by **30%** across cross-functional teams.
- Designed and maintained **end-to-end Azure DevOps CI/CD pipelines** integrating **SonarQube SAST**, **tfsec**, **tflint**, and **manual approval gates**, improving deployment speed by **80%**.
- Improved **code quality** by enforcing **branch policies**, **PR reviews**, and **build validations**, reducing defects by **25%**.
- Secured Azure resources using **RBAC**, **Azure Key Vault**, and **Managed Identities**, achieving **99.9% uptime**, **100% audit compliance**, and **zero hardcoded secrets** across all environments.
- Achieved proactive monitoring by configuring **Azure Monitor alerts** and **dashboards**, enhancing **operational efficiency**.
- Reduced **cloud costs (15–20%)** by optimizing **underutilized Azure resources**.
- Collaborated closely with development teams on **code reviews**, **version control**, and **automated deployments**, following **best practices**.
- Mentored **10+ junior engineers** in **Terraform**, **Git**, and **CI/CD**, improving **onboarding efficiency** by **35%**.
